

Student Support (All ages)

Student Support:

Senior staff and Teachers often find they are spending much of their time looking after the emotional well-being of students. This can be time consuming and exhausting when part of their daily routine.

CLS has been providing student support to schools for over 12 years.

Suitably qualified and experienced counsellors are able to support students through most of the issues that may arise.

Referral to other health professionals may be part of any recommendations.

Small group work may assist with friendship groups, conflict resolution and bullying.

Family issues, including separation, conflict, mental health, physical illness, can impact our young people.

CLS is able to support them, relieving the load for senior staff and teachers.
